Introduction to Nim

Boitumelo Phetla

[1] *General-purpose Programming Language*

May 16, 2019

Nim is unique. It is multi-paradigm, general purpose programming language with syntax like Python. However, the lanaguage or the design of this programming language does not emphasize on Object Oriented Programming style/concept. The language follows its own programming styling, it is imperative that its syntax styling is kept as guided by Nim's reference manual. Nim focuses mainly on effiency, expressiveness, and elegance. Nim is much like any other programming language with features such as concurrency, parallelism, user-defined types, the standard library, and more. Nim also has Nim's specific features such as asynchronous input/output, metaprogramming, and the foreign function interface.

1 What is Nim?

Impatience is my vice, I want to know I have the right tools for the job before I commit. So what does this mean?

How to install Nim

```
$bash: brew install nim

==> Pouring nim-0.19.4.mojave.bottle.tar.gz
/usr/local/Cellar/nim/0.19.4: 411 files, 12.8MB
```

Simple Script

Create file hello_world.nim

```
#simple comment line
echo "Hello world!"
```

Compile Script

Compile hello_world.nim

```
$bash: nim compile --run hello_world.nim
Hint: used config file
    '/usr/local/Cellar/nim/0.19.4/nim/config/nim.cfg'
    [Conf]
Hint: system [Processing]
Hint: hello_world [Processing]
CC: hello_world
CC: stdlib_system
Hint: [Link]
Hint: operation successful (12382 lines
    compiled; 0.660 sec total; 16.383MiB
    peakmem; Debug Build) [SuccessX]
Hint:
    /Volumes/pulse/100/Nim/ch01/code/hello_world
    [Exec]
Hello world!
```

Terminal output results

At this stage I try to understand what the terminal is showing and if I cannot make sense of it, I at least try to find out if my output results is as expected.

```
Hint: used config file
    '/usr/local/Cellar/nim/0.19.4/nim/config/nim.cfg'
    [Conf]
    <---- :accessing this directory shows
        |------ nim.cfg
        |------ nimdoc.cfg
        |------ nimdoc.tex.cfg
Hint: system [Processing]
Hint: hello_world [Processing]
```

```
CC: hello_world  <--- looks like Nim is using
    clang
CC: stdlib_system <--- looks like Nim is using
    clang
Hint: [Link]
Hint: operation successful (12382 lines
    compiled; 0.660 sec total; 16.383MiB
    peakmem; Debug Build) [SuccessX] <---
    processed Nim packages
Hint:
    /Volumes/pulse/100/Nim/ch01/code/hello_world
    [Exec] <--- script location
Hello world! <--- Expected output
```

What is in the file/script

```
In the code repo Nim has created some sort of an
    object file hello_world (machine code) that
    Nim (JVM if it is running on it) uses to
    compile and read the script. Languages such
    as Java, C, C++ uses such approach
    (compiled languages). Python does not do
    such (interpreted language).

$bash: tree -L 1
    hello_world
    hello_world.nim

0 directories, 2 files
```

1.1 Beginning to learn Nim

Nim is still a relatively new programming language (first scribbed books —- Nim in Action, Dominik Picheta).

What should you know going in:

- The language is not fully complete
- Nim is a general-purpose programming language
- effiency, expressiveness and elegance are Nim's standardised priority markers and they rank according to the order mentioned
- Nim shares many of Python's characteristics
- Nim is a compiled language (translated to C first)
- Nim is well suited for systems programming (hardware, OSs, IoT, etc)
- Nim is one of the few languages that uses its own language to interpret itself
- type system, execution model
- Applications that perform I/O operations, such as reading files or sending data over a network, are also well supported by Nim.
- Web applications (web frameworks like Jester)
- Nim can compile JavaScript
- Things that you might be familiar with are covered in Nim (procedures, methods, iterators, generics and templates)
- Nim's documentation

1.2 Why should you use Nim

Python, C, C++, ObjC, JavaScript $\longrightarrow$ Nim's design follows that of Python with the capability to perform foreign interfacing (C, C++, ObjectiveC)

Nim projected started in 2005 $\longrightarrow$ The language is 14 years old, so you will be some sort of an early adopter

Garbage collector $\longrightarrow$ Garbage collection + manual memory management

Game developers $\longrightarrow$ because of a garbage collector that can be turned on and off this is a useful application for GameDevs

Scientific computing $\longrightarrow$ Data Scientists

Scripting $\longrightarrow$ Clue codes

Operating Systems $\longrightarrow$ Supports Windows, Linux, Unix

effiency $\longrightarrow$ Nim focues on compile-time mechanisms (runtime becomes effient)

Package manager $\longrightarrow$ Nimble

Environments to use Nim $\longrightarrow$ Web applications, Kernel

Andreas Rumpf $\longrightarrow$ Andreas Rumpf is the designer of Nimrod programming language, which he develops in his spare time. He is a software engineer working at a top secret company and constantly attempts to create his own start-up which he will allow himself to program in Nimrod full-time. He has programmed in various programming languages over the years (including quite obscure ones) without being satisfied with any of them. Andreas Rumpf holds a degree in Computer Science which he obtained from the University of Kaiserslautern.

The compiler, standard library, and related tools are all open source and written in Nim. The project is available on GitHub, and everyone is encouraged to contribute. Contributing to Nim is a good way to learn how it works and to help with its development.

1.3 Core features of Nim

1. Metaprogramming $\longrightarrow$ customizing Nim
2. Style-insensitive $\longrightarrow$ camelCase or snake_case
3. Compilation to C $\longrightarrow$ enhances the language's performance

Aliquam elementum nulla at arcu finibus aliquet. Praesent congue ultrices nisl pretium posuere. Nunc vel nulla hendrerit, ultrices justo ut, ultrices sapien. Duis ut arcu at nunc pellentesque consectetur. Vestibulum eget nisl porta, ultricies orci eget, efficitur tellus. Maecenas rhoncus purus vel mauris tincidunt, et euismod nibh viverra.
